Web322 Assignment 1

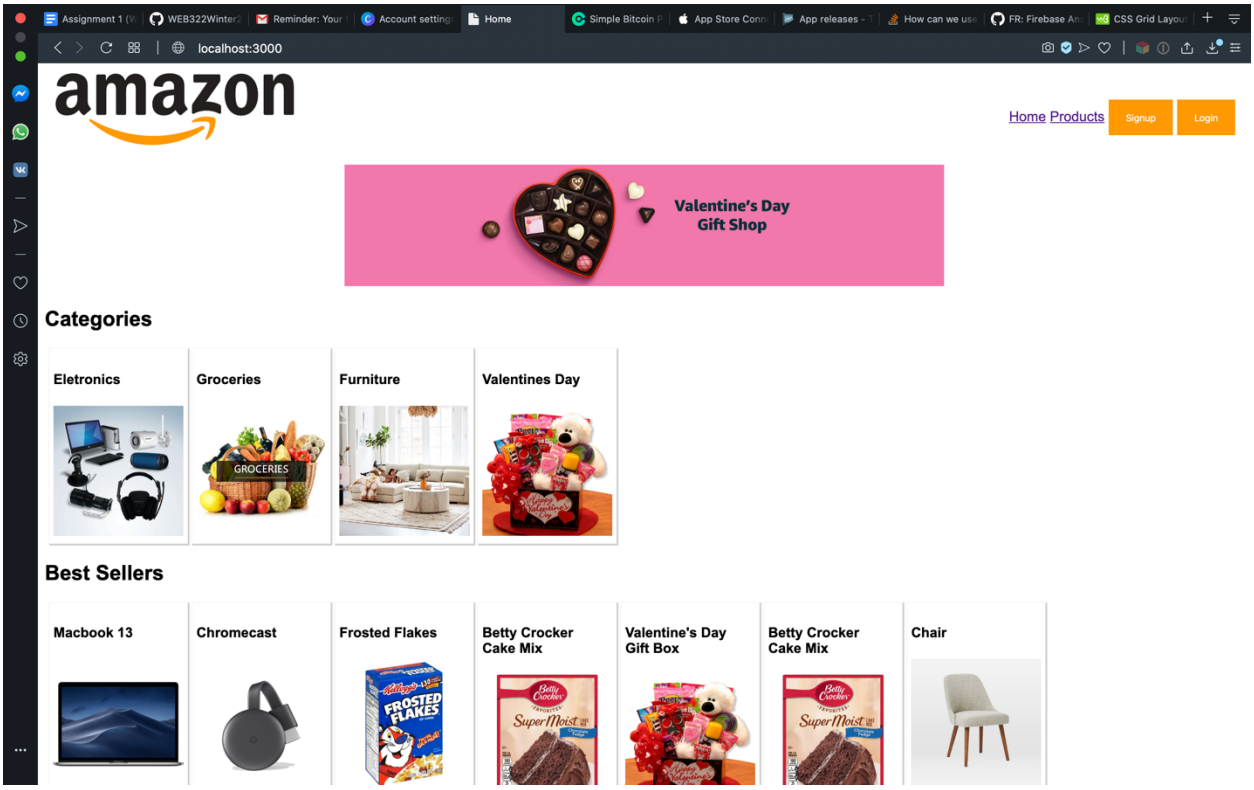
In this assignment I create an Amazon web page to list products and with login and signup modal popups.

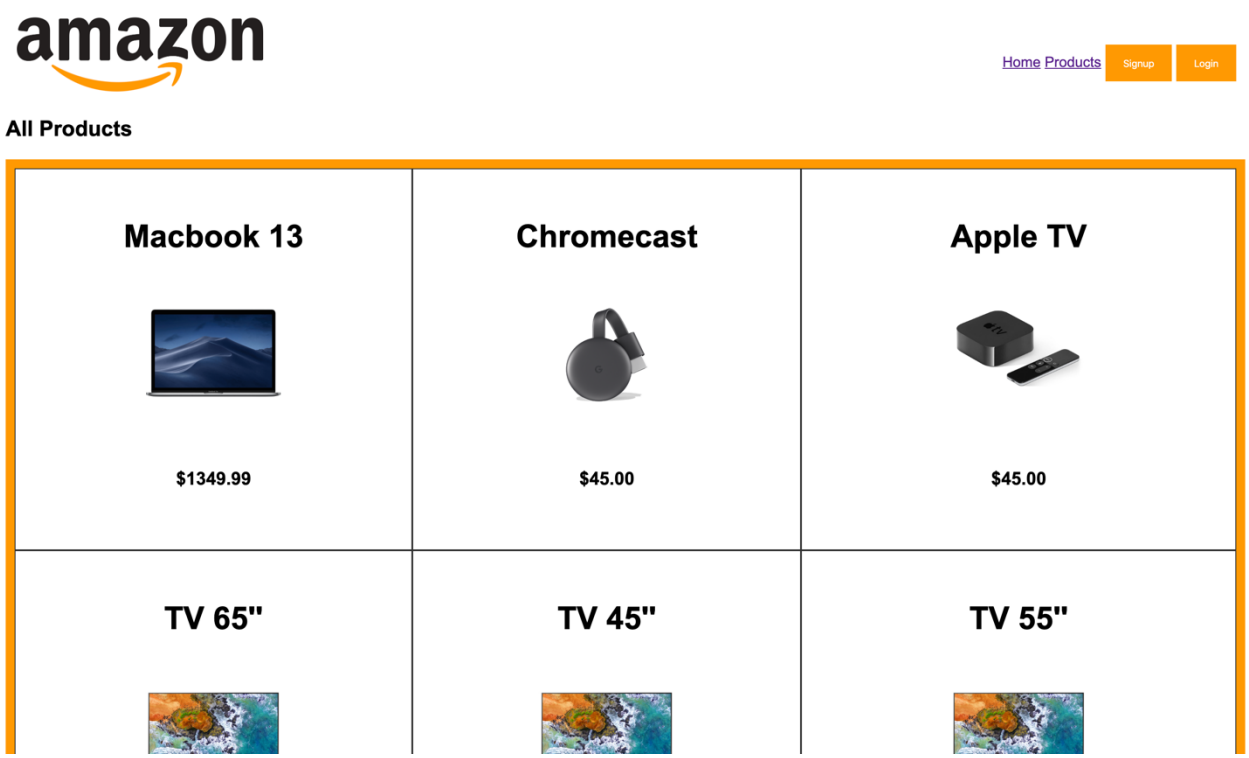
HOME

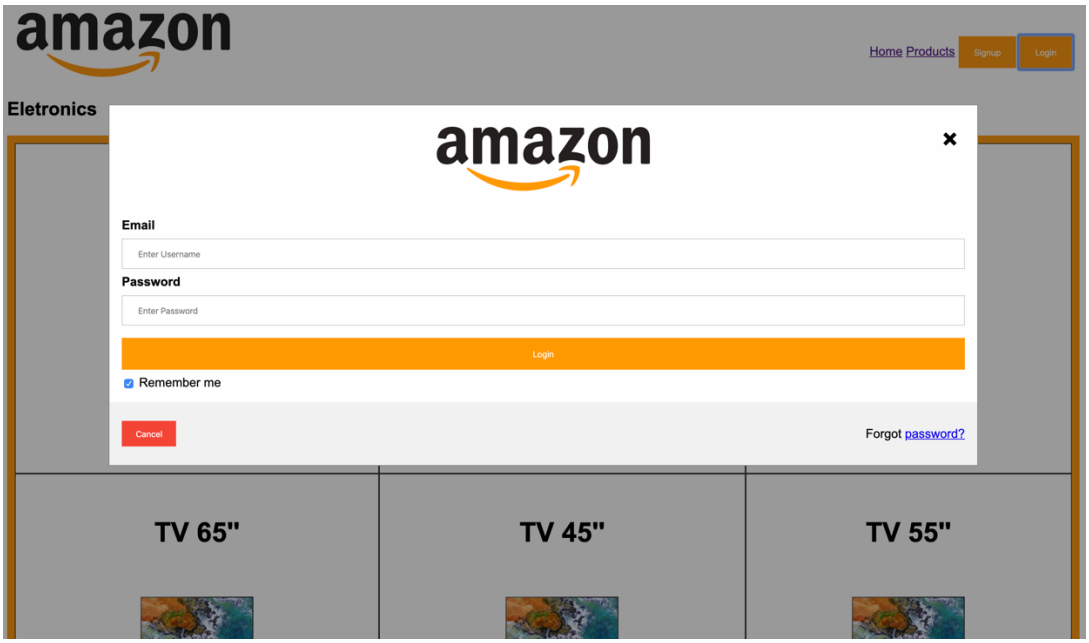
In the home page I implemented 3 sections: Promotion Section, Product Category Section and Best Seller Section. Also I implemented a header, a navigation and a footer, that are common to all the pages.



Product List Page

In the product list page I implemented a grid view with 3 columns showing all the products if it is coming from the route /products or all the products of a category if it is coming from the route /productsList.



Registration / Login


I implemented the registration and the login as modal popups.
